

ROTEK UDF GAC Cartridge

Granular Activated Carbon (GAC) Filters

ROTEK’s GAC filters are designed with high-quality coconut shell-based activated carbon to deliver efficient removal of chlorine, organic compounds, unpleasant tastes, and odors from water sources. With superior adsorption properties, these filters enhance water quality for a variety of applications.

Applications

- **Household water purification** – Reducing chlorine, pesticides, heavy metals, and organic contaminants from tap water.
- **Food & Beverage** – Purifying water used in beverage production, breweries, and food processing.
- **Industrial applications** – Treating water in pharmaceutical, electronics, and cooling tower applications.
- **Municipal water treatment** – Removing taste, odor, and organic compounds from public water supplies.

2.5” Diameter

Part Number	Diameter	Length	Case qty
GAC-10	2.5”	10”	25
GAC-20	2.5”	20”	20

4.5” Diameter (Big Blue)

Part Number	Diameter	Length	Case qty
GAC-10-BB	4.5”	10”	10
GAC-20-BB	4.5”	20”	6

Specification

Material (media)	Activated Carbon (6×12 mesh)
Material (end caps)	Polypropylene
Material (inside/outside)	Polypropylene
Hardness	>99%
Water Soluble Content	<0.2%
Carbon Tetrachloride Adsorption	>60%
Iodine Adsorption Capacity	1000mg/g
pH Value	9-10
Cartridge Packaging	Shrink wrapped
